Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Susnow et al. (US 2002/0159385) in view of Ebata (US 2003/0174652).

1. Regarding claims 1, 5-6, 10-12, 18-19, 25 and 27, Susnow discloses a method of a switch element for processing fibre channel frames (para. 24) comprising assigning a first virtual lane to a frame (para. 38), determining if the assigned virtual lane has a credit (para. 49) and transmitting a frame if a credit is available (para. 38, last five lines).
2. However, Susnow does not disclose assigning virtual lanes based on a hop count. Ebata discloses queuing based on a hop count (para. 9). Therefore, it would have been obvious to one skilled in the art at the time the invention was made to have a virtual lane (i.e., queue) based on a hop count in order to provide a fair transmission of packets based on their traveled distance (Ebata, paras. 7-8).
3. Regarding claims 2, 8-9, 13, 15-16, 20, 22-23 and 26-28, in Susnow credits are incremented/decremented when the frame is sent/received (para. 49).
4. Regarding claims 3, 7, 14, 17, 21 and 24 in Susnow there is a maximum credit (para. 78).
5. Regarding claims 4, in Susnow if all credits are used the next lane is selected (para. 71).
